Audiovisual Archive for Institutions

2019 REPORT #4

INTRODUCTION

OnArchitecture is an audiovisual archive of architecture online, founded in 2012 by Chilean architects Felipe De Ferrari and Diego Grass along with psychologist Claudio Mesa. It offers a deep and detailed panorama of the world's main authors, works, experiences and issues related to the field of architecture, urban design and built environment.

We have produced a series of videos of buildings and interviews with architects, artists, curators, researchers and urban designers from around the world since 2008. At the moment we have done more than 200 interviews and more than 300 portraits of buildings of different scale and use.

OnArchitecture is nowadays the largest audiovisual architecture archive available.

This database is available as a subscription service for architecture schools at www.onarchitecture.com. Since 2018, it is distributed by EBSCO.

The independent and critical approach of our videos has attracted commissions from editorial houses such as Gustavo Gili and cultural institutions such as Barcelona Design Museum, Vitra Design Museum or the Heinz Architectural Center.

The following pages contain some of the activities held by our team in 2018 and a complete catalogue of available films, together with a list of forthcoming titles. This is a report but also an invitation to generate collaborations -conferences, exhibitions or printed publications- with academics and culture agents in the future.

For comments, suggestions or proposals, please write us to contact@onarchitecture.com
